As a driven and tech-savvy web developer, I have always had a strong gravitational pull toward technology. I am looking to bring my attention to detail, leadership experience, and technical skills to a company to grow and become a valuable asset. I have gained experience in the foundations of web development while honing my skills in JavaScript, CSS, React.js, and responsive web design and hope to leverage my expertise to make a meaningful and lasting impact on the company. I have just completed a rigorous web development coding certificate program at the University of Washington, equipping me with the latest skills and knowledge in the field. With a keen interest in ongoing learning, collaboration, and problem-solving, I aim to develop and sustain mobile-first web applications that contribute significant value to the company.

TECHNICAL SKILLS

MongoDB, Express.js, React.js, Node.js, SQL, mySQL, Sequelize, JWT, Heroku, GitHub, JavaScript, CSS, HTML, Agile Development, Test Driven Development, SDLC
