SUMMARY

As a driven and tech-savvy web developer, I have always had a strong gravitational pull toward technology. I have recently graduated from an intensive web development coding certificate program at the University of Washington. I have gained experience in the foundations of web development while honing my skills in JavaScript, CSS, React.js, and responsive web design. Having an appetite for continuous learning, collaboration, and problem-solving, I plan to create and maintain mobile first web applications. I am looking to bring my attention to detail, leadership experience, and technical skills to a company to grow and become a valuable asset.

WORK EXPERIENCE

Moorage and Office Supervisor, 10/2021 - Current
Port Of Edmonds

- First full year resulted in 5 year highs for occupancy and moorage revenue.
- Supervised cohesive team of office and operational staff.

PROJECTS

🔗 **WatchWorthy**

This web application was made to track movies that a user watches as they progress through watching movies lists.

🔗 **RecGrabber**

This web application was made to locate trails and campsites around a city of your choice.

🔗 **BlindBooking**

This web application allows the user to make vacation plans without actually picking a location.
